Green Jobs for Nature

2024 has been a year of growth for our Green Jobs for Nature project.

As you can see, the Green Jobs for Nature project has grown massively this year. From recruiting our fantastic ambassadors to attending some of the biggest career events in the UK, we've hit some major milestones to celebrate. However, the project still has a way to go to where we want it to be and we're more ambitious than ever heading into 2025.

Ways that you can get involved

A big thank you to the 169 people who have submitted a job profile to be published on our website. It's great to have so many examples of the range of work available in the environment sector to inspire young people and career changers to consider pursuing a green career.

We are always welcoming new profile submissions, however we are particularly looking for submissions from the following types of people:

- Professionals based in Ireland
- Professionals based in Wales
- Environmental educators
- Forestry and Arboriculture roles
- Media and Communications roles

Scan the QR to submit a profile

Now that survey season has come to an end, you may find yourself with a lighter schedule and availability to record a video profile throughout your working day, which we can share on our website and social media.

Things like a day-in-the-life or vlog are exactly the kind of things we're looking for.
